

Air-12

environmental data

Based on AIR-12
Complies with SKA rating

FIRA furniturefootprinter™ Orangebox's Footprints were calculated by FIRA's Carbon Footprinter Tool. The technique of Ecological footprint analysis co-originated in the 1990's by Professor William Rees and Dr Mathis Wackernagel.

New work trends mean companies are adopting more agile working practices and demand flexibility from their architecture and furniture. Orangebox Air³ pods are a new archetype in the workplace and are subject to interpretation on their use and which regulations might apply. As a result, please be sure to consult with your local building "authorities having jurisdiction(AHJ)" and confirm any local regulations and standards that may apply before you specify and order.
